

# California OES Weather Threat Briefing

Thursday, May 23, 2019  
9:00 AM PDT

**Day 1: Thunderstorms are possible across portions of Inland and Southern Regions today. Accumulating snow is possible in the Sierra above 8,000 feet.**

**National Weather Service**  
*Western Region Headquarters  
Regional Operations Center  
Salt Lake City, UT*

# **WEATHER KEY POINTS**

**05/23/19 - 05/29/19**

## **Thursday-Friday**

- Showery conditions continue across the state through the work week, especially along the higher terrain
  - The debris flow threat on burn scars is very low. Debris flows are not likely.
  - Thunderstorms are possible today in portions of Southern and Inland Regions, which could produce brief moderate to heavy rainfall, small hail, gusty winds, and funnel clouds.

## **Saturday-Monday**

- Another storm system will move into California for the holiday weekend, bringing an increased threat of showers, thunderstorms, and gusty winds, especially Saturday and Sunday
  - Accumulating snow is possible again in the Sierra above 7500 feet
  - The heaviest precipitation will likely be focused on the northern half of the state, but there is a chance of precipitation for Southern Region as well

## **Tuesday-Wednesday**

- Drier weather is possible by mid-week, though confidence in details is currently low
